

# Illinois State Police Forensic Science Center at Chicago User Agency Training Class

## “Forensic Science Seminar: Getting the most out of the ISP FSC-C”

### Current 2012 Class Schedule

January 25

February 29

March 21

April 25

July 25

October 24

This training class is designed for all law enforcement agencies that routinely submit forensic evidence to the Illinois State Police, Forensic Science Center at Chicago (ISP FSC-C). Specifically, Crime Scene Investigators, Detectives, and Evidence Technicians, or anyone involved in deciding what evidence to collect and/or submit to the laboratory, and those responsible for interpreting the results of the laboratory analysis. This full day class (8:30am to 4:30pm) will cover all forensic disciplines offered at the ISP FSC-C to include the CODIS, IBIS, and AFIS databases. The class will specifically cover; what types of analysis each section can perform, and cannot perform; special considerations for properly handling evidence; how to read and understand the laboratory reports from each section; a review of the science behind each forensic discipline; and leave plenty of time for Q&A with each presenter.

Please contact Assistant Laboratory Director Scott Jensen, (312) 633-3982, if you have any questions or would like to reserve a seat.

If your agency, or group, has 25 or more participants; a separate date can be added and changes to the program outline can be made to tailor the class to better meet your needs.
